

Redmond Spinal Care, P.C.

Terms of Acceptance

When a patient seeks NUCCA Chiropractic health care and we accept a patient for such care, it is essential for both parties to be working towards the same objective.

NUCCA Chiropractic care has only one goal. It is important that each patient understand both the objective and the method that will be used to attain it. This will prevent any confusion or disappointment.

Correction: A correction is the specific application of forces to remove a misalignment found in the spine.

Health: A state of optimal Physical, mental and Social well-being, not merely the absence of disease or infirmity.

Vertebral Subluxation: A misalignment of one or more of the 24 vertebra in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in a lessening of the body's ability to express its maximum health potential.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxation complex. However, if during the course of a NUCCA chiropractic spinal examination, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area.

Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. **OUR ONLY PRACTICE OBJECTIVE** is to eliminate the major interference to the nervous system caused by a misalignment of the spine. Our only method is specific adjusting to correct vertebral subluxations.

I have read and fully understand the above statements.
